

# Mosaic

We can offer different kinds of mosaic slate, such as black, green, gray, rusty and multicolor etc..

The pieces forming the mosaics could be cutted in minimum size of 1\*1 cm(0.245"\*0.245".) and many different kinds of shapes, in natural cleft, honed or tumbled finishes, a process by means of which the pieces acquire a weathered look, which is both elegant and pleasing to the eyes. The pieces are set onto a fiberglass mesh and are bonded by a water-soluble, neutral glue, altogether harmless to the stone. Also according to your demands and drawing, we can make and process any different kinds of mosaic slate.
